Introduction to Insulin and Injectables Therapies

Wednesday 7th March 2018
Carlisle Business Centre
Carlisle Road
Bradford
BD8 8BD

Case Studies
GLP 1 Agonists
Insulin
Treatment Regimens

This seminar will update GPs and Practices Nurses on the management of diabetes in primary care

Book online at www.medicalupdate.co.uk
Speaker

Paul Dromgoole
DSN and Clinical Lecturer in Diabetes

Paul has over 18 years experience in diabetes management in primary care and secondary care settings in Brighton, Leicester and York and more recently worked as a half-time Lecturer Practitioner in Diabetes at the University of York teaching on diabetes programmes from Pre-Registration up to Masters Level.

He has extensive experience of supporting General Practice in clinical decision making and best practice in diabetes management and his teaching sessions and workshops are consistently highly evaluated for their clinical content, delivery and application to ‘real-life’ clinical practice.

Paul now combines a 2 day a week role as Clinical Nurse Specialist in Diabetes, with freelance lecturing.

Why attend?

The course provides an introduction to the use of insulin and injectable therapies in the management of diabetes. It is aimed at GPs and Practice Nurses who do not have a special interest in diabetes but who want to refresh their knowledge of injectable therapies. GPs and Practice Nurses who work in diabetes clinics are also welcome to attend.

Learning Objectives

On completion of this course, participants will be able to:

• Provide patients with greater insight into the place of injectable therapies
• Help overcome issues around barriers to injectable therapy including injection fears and perceptions
• Describe the practical steps in initiation of GLP1 and insulin therapy
• Better support patients already on insulin therapy in their practice, interpreting blood glucose profiles and advising on insulin adjustment
• Offer ongoing management support to patients with regards to sick day rules, travel, driving etc..
