referred but shouldn’t be, and cases that should be referred but often are not.

Faculty

Dr Oliver Lily
Consultant Neurologist, Neurosciences Centre, Leeds General Infirmary
Honorary Senior Lecturer, University of Leeds

Dr Lily trained as a junior doctor at St James’s Hospital and Leeds General Infirmary before researching the causes of multiple sclerosis at the Institute of Molecular Medicine at Oxford University. As a consultant neurologist at the Neurosciences Centre and Leeds General Infirmary, he has special responsibility for the provision and supervision of treatments for multiple sclerosis.

In his general clinics Dr Lily sees patients with a wide range of conditions including headaches, epilepsy, blackouts and medically unexplained symptoms.

Dr Jayne Alty
Consultant Neurologist, Neurosciences Centre, Leeds General Infirmary
Honorary Senior Lecturer, University of Leeds

Dr Jane Alty qualified from Cambridge University Medical School and trained in neurology at St James’s University Hospital Leeds and The National Hospital for Neurology and Neurosurgery London before commencing the Specialist Registrar neurology training scheme in West Yorkshire. She has a specialist interest in movement disorders in particular Parkinson’s disease, tremor and dystonia. She has undertaken a Movement Disorders Fellowship in Melbourne, Australia, published papers on Parkinson’s disease, cognitive impairment and tremor, and co-authored three books.

Dr Maruthi Vinjam
Consultant Neurologist, Neurosciences Centre, Leeds General Infirmary

Dr Vinjam qualified from Pondicherry University in India. He did foundation year training and year of Neuro Rehabilitation in West midlands and core medical training at Bart’s London rotation. He moved to Yorkshire for neurology training and after completing neurology training started a Multiple Sclerosis fellowship (post CCT fellowship). He is due to finish this in September 2016.

Dr Ahamad Hassan
Consultant Neurologist and Stroke Physician, Leeds General Infirmary

Dr Ahamad Hassan graduated from Oxford and then Kings College London, qualifying in 1994. He trained in neurology in Leeds as well as at St George’s Hospital London, where he spent three years on his PhD thesis on the genetics of cerebrovascular disease. He also has a subspecialty interest in stroke medicine and covers one of the stroke units at the LGI. He contributes to an active research programme sponsored by major bodies including the Wellcome Trust and the Stroke Association.

Dr Rumana Chowdhury
Consultant Neurologist, Neurosciences Centre, Leeds General Infirmary

Dr Rumana Chowdhury graduated from the University of Newcastle upon Tyne. She trained in general medicine in Newcastle upon Tyne and in neurology in London at Kings’ College Hospital, Guy’s and St Thomas’ and the National Hospital for Neurology and Neurosurgery. She was awarded the national British Neuroscience Association award (2013) for her PhD thesis. She was appointed as a Consultant Neurologist at Leeds Teaching Hospitals Trust in 2016 where she runs general neurology clinics and is developing a cognitive neurology service.

Dr Marc Boix Codony
Consultant Neurologist, The Walton Centre Liverpool

Dr Boix Codony graduated from Universitat de Lleida in Spain in 2004. He completed his Neurology Specialist Training in Spain in 2009. In 2010 he obtained a Master’s Degree and started work as a Consultant Neurologist in Hospital Universitari Arnau de Vianova. In 2012 he became a Fellow of the European Board of Neurology shortly before moving to Pinderfields General Hospital in Wakefield, setting up a Neuromuscular Disease Service and acting as the Clinical Lead for the Motor Neuron Disease. In July 2016 he was appointed as a Consultant Neurologist with special interest in Neuromuscular Disease at The Walton Centre in Liverpool.
Who should attend?

- General Practitioners
- GP Registrars
- Advanced Nurse Practitioners
- Community Matrons

Why attend?

This one day course offers a comprehensive and intensive update for the busy GP on managing common neurological problems ranging from headaches and fits to stroke and medically unexplained symptoms.

Sessions are evidence-based, patient-focused, structured and interactive, with plenty of opportunities for questions and answers, and with a focus on areas that can impact practice and on practical guidance in relation to areas of controversy.

A guiding principle of the course is that in the large majority of cases GPs knows which patients to refer and which to manage in the practice; however, the competent GP also encounters a significant number of ‘grey’ cases in daily practice where there is genuine doubt. Faculty are asked to focus on these areas, as well as cases that are commonly referred but shouldn’t be, and cases that should be referred but often are not.

Learning outcomes

- An increased recognition of common neurological conditions
- An improved awareness of when and how to investigate common neurological conditions
- A greater understanding of when to refer to neurologists
- To enable GPs to feel more confident in managing neurological problems in primary care.

What delegates have said about previous Medical Update events

“Excellent - great balance of interesting topics and lots of positive points learnt”

“Wide range of topics, smoothly run, excellent speakers with a great atmosphere”

“Good volume of knowledge passed on, short duration of each topic - easier to maintain concentration”

“Fantastic practical advice, lots of good tips”
